Detailed Office Action

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-54,59-83, drawn to paper sorting apparatus, classified in class 356, subclass 73.
- II. Claims 84-88, drawn to optical calibration, classified in class 356, subclass 445.

Inventions group I and group II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)).

In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the paper sorting apparatus does not require the particular method for calibrating and normalizing the apparatus set forth in the subcombination group II. The subcombination has separate utility such as calibrating and normalizing a color detection apparatus.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for

examination purposes as indicated is proper.

Claims 55-58 link(s) inventions group I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 55-58. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Further , should Applicant elects the combination group I, Applicant is required to further elect one of the three species set forth below:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: (specification page 5, last paragraph; page 6, lines 1-6) (claims 4-9,17-19,21,28,30,36-37,62-63,66-68) drawn to detecting printed material.

Species II: (fig 5) (claims 10-11,20,27,29,69-83) drawn to detecting glossiness of the object)

Species III: (specification page 4, last paragraph; page 5, lines 1-10) (claims 31-35,38-54) drawn to color detection and aberration correction.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1-3,12-16,22-26,59-61,64-65 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
